

AFTERCARE GENUINE ICE PRINTHEADS

ICE

ICE is the sole distributor of the Zodiac coder in the UK and work with a number of carefully selected partners to supply the consumables, spares and service to the market. As the OEM, we are able to offer all of our customers instant telephone technical support which is free of charge and based on our knowledge and experience of the machines using genuine ICE consumables and spares.

How to identify genuine ICE printheads

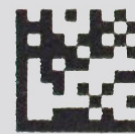

ICE part number: **KCE-53-12PAJ1ZPH**

GENUINE ICE PART	MODIFIED PART
	
	
GENUINE PRINTS	MODIFIED PART PRINTS
	

Genuine ICE printheads are designed to maximise the performance of your Zodiac coder to avoid:

- Damage to electronic components
- Reduced print quality
- Reduced printhead life
- Invalidating your printer warranty

All genuine ICE printheads are marked with a label, which quickly identifies them as genuine ICE parts.

**GENUINE
ICE Part**

The QR code on the label allows for printhead life to be tracked for added customer assurance.

Beware of modified printheads

- There are a number of companies offering modified parts to fit the ICE Zodiac coder, claiming they are genuine ICE parts when they are not.
- These items are modified by drilling additional holes into the heatsink of the device. This creates a substantial risk of damaging the electronic components within the device.
- Genuine ICE printheads have these holes drilled prior to assembly to prevent this risk. Many of the fake parts have different internal electronics and will reduce the performance of the printer.
